EVOLVE SERIES® **CONDITIONERS**

BETTER SCIENCE. BRILLIANT WATER®

ONE UNIT. ONE SOLUTION.

High quality water is an essential part of every day life. And whether your water is supplied by the city or a private well, your water problems might include:

- Foul tastes and odors
- Acidic water leaving blue and green stains and corrosion damage
- Iron causing rust stains and build-up
- Hardness creating deposits and scale

Evolve conditioners combine exclusive **Crystal-Right™** media with self-monitoring, deep cleaning technology. The revolutionary media acts as an exceptional filter, removing hardness, iron, and manganese, while raising the pH (EV1 only) of acidic water at the same time. Combined with our exclusive chlorine generator,* the chlorine cleans the media with each regeneration providing fresh, delicious water to your home.

The system controller records your water usage and adjusts it's cycles accordingly, performing at maximum efficiency. All of these features provide the brilliant water only science could produce.

THE CRYSTAL-RIGHT™ MEDIA ADVANTAGE

Unlike normal softening resin, **Crystal-Right™** effectively filters problem minerals, such as iron and manganese, while correcting acidic water conditions. This multi-functioning media performs like three different systems in one unit. Crystal-Right is silica-based media with a high tolerance for the chlorine used to keep your system clean all while softening your water. This durable, innovative filter is engineered as two different types to build a system that is perfect for your home.

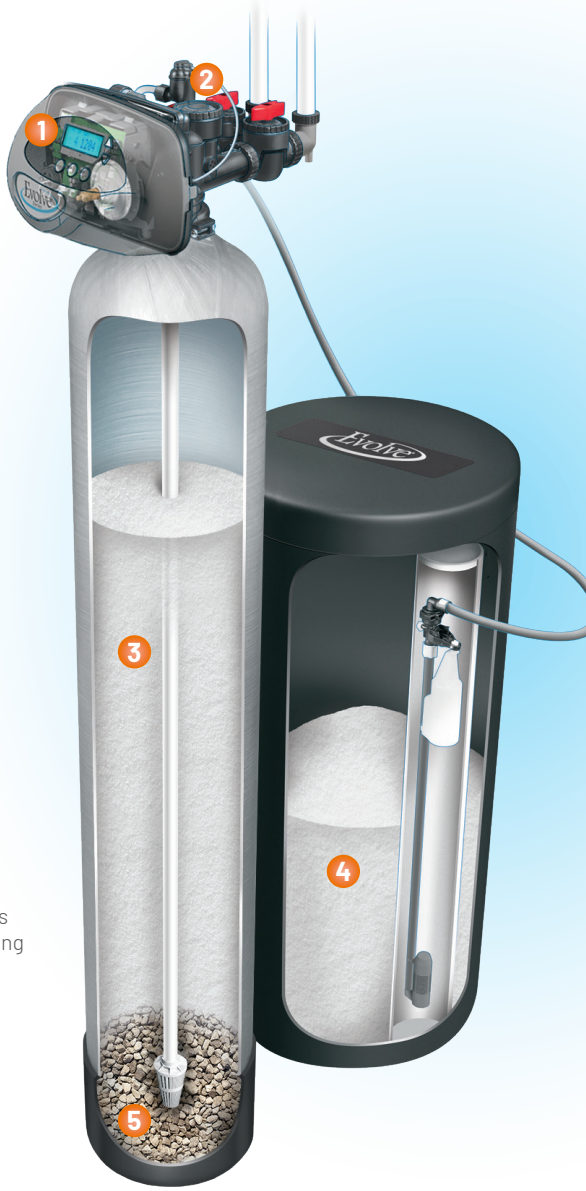
EV1 Models:
- Equipped with CR-100 media
- Reduces hardness, iron, manganese
- Raises low pH

EV2 Models:
- Equipped with CR-200 media
- Reduces higher amounts of hardness, iron, manganese

**Our chlorine generator is not intended for treating non-potable water.*

BETTER SOLUTIONS FOR BRILLIANT WATER.

Every component, feature, and innovation of the Evolve Series® conditioners has been designed to bring the highest quality, most efficient water to you and your family.



1 PATENTED TECHNOLOGY IS SMARTER.

- Deep cleaning regeneration only when necessary
- Exclusive features insures consistent water quality
- Vacation Mode to prevent unnecessary regenerations
- Vacation Mode for your convenience, money-savings
- System notifications

2 PATENTED, INTEGRATED CHLORINE GENERATOR

- Self-chlorinates
- Low/No salt alerts
- Monitors every cleaning

3 EXCLUSIVE CRYSTAL-RIGHT™ MEDIA

- Silica-based crystal media
- Tough enough to deliver the highest quality water
- Rigorous quality control process for testing the media
- Unique shape designed for superior filtration

4 LOW-MAINTENANCE BRINE TANK

- Built-in safety float
- Heavyweight, corrosion-free material
- Dry salt storage
- Less cleaning

5 QUARTZ UNDERBEDDING

- Delivers high and consistent flow rates
- Provides accurate and efficient cleaning process

	Brine Tank	18"W x 33"H	18"W x 33"H	18"W x 40"H	18"W x 33"H	18"W x 33"H	18"W x 40"H

[1] All Evolve water conditioners are pre-factory set at medium salting. Note: influent waters must be at least 3 GPG hardness and 80 TDS. A calcite or corosex unit may be needed for correct operation.

[2] Combined iron and manganese removal varies depending on the form of iron, manganese, pH and other local conditions. On waters that are pre-chlorinated or where other pre-oxidation occurs, precipitated metal oxides may form that are too fine to be filtered.

[3] The pH listed is the minimum for the influent water.

[4] Optimum pH adjustment occurs at 3.0 gpm or less at maximum salt settings. Higher flow rates will produce less pH adjusted water.

[5] Unit not tested for capacity at these flow rates. Water quality may vary.
